Exceptional meat quality

DANBRED DUROC

BRED FOR BUSINESS

Selecting the best terminal sire for breeding need not be difficult. DanBred Duroc's genetics delivers more pork for less costs, which results in a higher profit.

Expect larger, healthier litters and stronger weaners. Faster growing finisher pigs with lower feed conversion ratio. And a higher lean meat percentage. Choose the best performing terminal sire on the market to boost your business and stay competitive.

More pork for less cost

Offspring from DanBred Duroc has excellent feed efficiency and superior daily gain. This not only reduces the days until slaughter, but it also lowers total feed cost making you more profitable. Add to that the use of fewer resources, which makes you more sustainable.

World class growth rates

DanBred Duroc produces large litters with high survival rates and vigorous piglets. The progeny is robust and have uniform, high growth rates from birth to slaughter.

gram daily gain

Verified best-in-class performance

Take the gambling out of breeding. Time after time it has been documented that DanBred Duroc compared to other Duroc sire lines delivers outstanding performance with supreme finisher traits and great carcass yield per finisher pig.

Decades of data

Results are not achieved by chance. More than 30 years of professional selection and data collection has continuously improved the DanBred Duroc and its all-important breeding traits which directly benefits your business and bottom line.

feed per kg gain

Exceptional meat quality

Profit from more good meat. DanBred Duroc produces finisher carcasses with an excellent meat quality; pH, color and IMF. Its high lean meat percentage matches the trend for increasingly heavier finishers.

Uniformity and consistency

Pork production based on DanBred finishers also benefits from uniform and high-yielding animals. This results in a consistent high product quality with optimum lean meat content.
